

MAKING THE INVISIBLE VISIBLE:

Using Portfolio/Project Management to Create an Online Presence that Delivers Content & Services at Scale

Heather Jeffcoat, Web & Discovery Management Librarian, Georgia Tech Library

Catherine Murray-Rust, Dean of Libraries, Georgia Tech Library

LIBRARY NEXT

Growing out the Georgia Institute of Technology's theme of Creating the Next, **Library Next** is a multiyear transformation of the four elements that comprise a high functioning library, inspiring physical and digital spaces, outstanding services, curated scholarly content, and information expertise.

PORTFOLIO MGMT

The Library created a **portfolio of projects** in all aspects of Library Next. The large-scale online presence initiative brings together subject matter experts in technology, scholarly content, and library services to move the Library website a major step closer to a robust service hub.

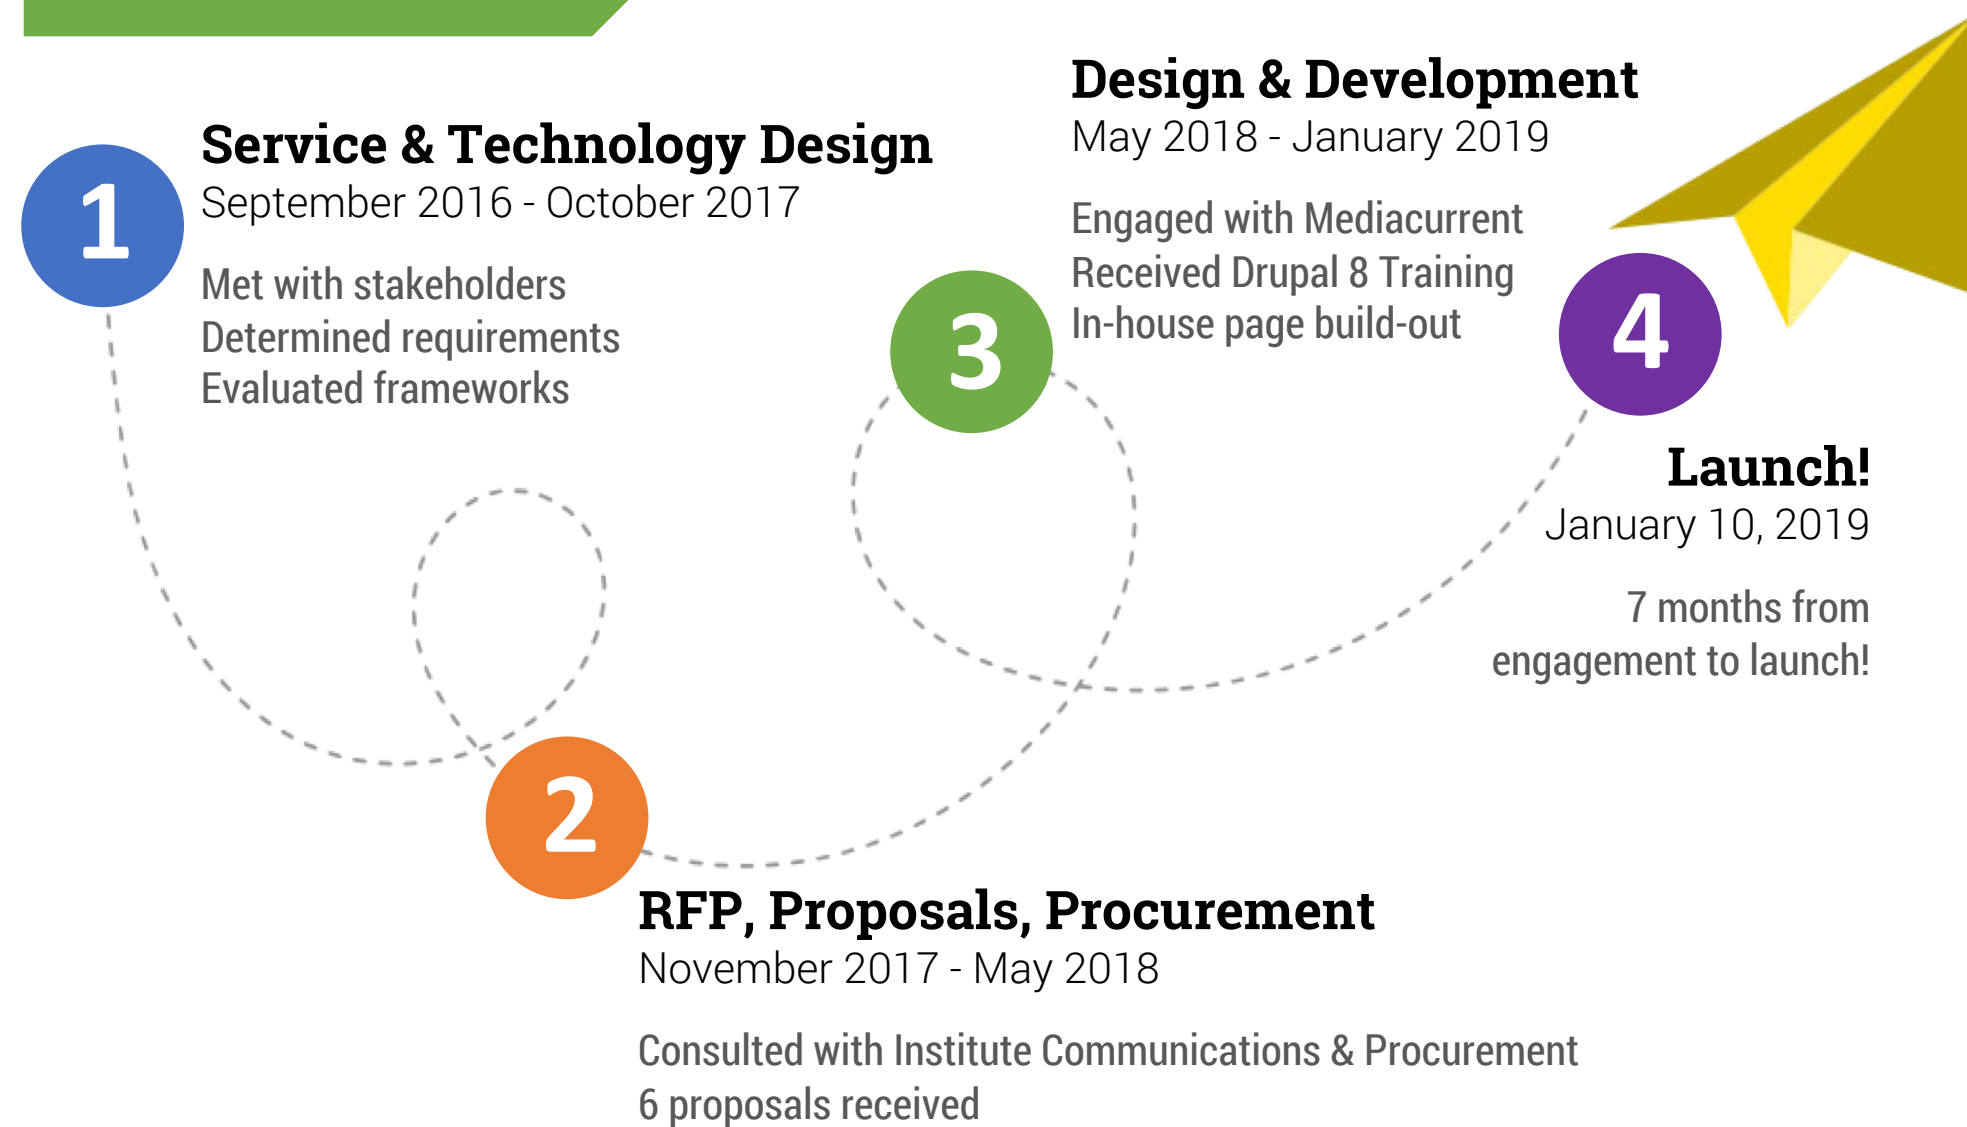

ONLINE PRESENCE

The Library website is paramount in creating an innovative, engaging and easy to use virtual "front door." Most faculty and students interact with the Library online. Our **online presence** needs to become a state of the art portal to research and learning which delivers Library content and services at scale.

The key to success of achieving the online presence goal is dependent on a rigorous project management process and a **TEAM** of subject matter experts. They are the **HEROS** of this story!

THE PROCESS

THE RESULT

PHASE 1 GOALS (complete):

- deliver a Drupal 8 framework which adheres to the GT branding guidelines
- responsive and mobile-friendly
- meet all required accessibility standards

PHASE 2 GOALS (future):

- build a framework capable of acquiring, preserving, and delivering services and collections virtually
- create a unified discovery interface for purchased and unique collections
